

Product backlog item	Business value	Estimated crunches
Hello Map - An android application displaying a Google Map	200	10
A view where a user can generate a random route from and back to his/her current position. It does not display the route but only gather information needed to display it	150	170
Display progressbar and statusmessage during the whole generation progress. On unsuccessful generation an error message must be displayed and the user shall be returned to the generationview	150	130
A view displaying a running interface with a map and the route generated drawn ontop of the map	140	145
The ability to start running a route, displaying a running interface during the whole run.	120	50
Display current GPS position on the running interface's map	135	80
Display distance ran in running interface	130	50

Display timer in running interface	130	25
Generate a route with a set distance	125	120
When the route has been ran, automatically save the route together with gathered statistics on my phone	115	100
Stop a run from the running interface, this shall end the run as if the route was generated to end at this point but somehow save that the run was cancelled	100	60
Reimplement how the routes are calculated, with focus on: Producing an optimized route. It shall look good!	100	130
Be able to play songs from spotify from inside project application	80	200
Be able to point a song to a specific position. So that it starts at that point with a fade-out/fade-in.	50	
View statistics from earlier rounds	50	

Be able to have songs depending on average speed/km. If last KM took 4 minutes to run, that is fast bro! If you ran it during 7 minutes, that is slower.	40	
Provide text to speech directions during the run	40	
Set starting point and ending point for the route on a map	35	70
Choose unit (miles or km) to be used throughout the whole app	5	20
Use (run) an earlier saved route	30	
Make a look n feel for buttons and other visible elements It shall look good and be consistent over the whole app	30	inf.
Set a bounding area to contain the generated route	30
