

Make My Run User Guide

Installation

1. Visit <https://github.com/Salking/MakeMyRun/tags>
2. Make sure you can run custom .apk files by:
 - a. Go to Settings
 - b. Click on Security
 - c. Make sure "Unknown sources" is enabled
3. Download the latest version x.x.x.zip file to your Android 4.0.3 or later compatible phone. This can easily be done through your phone's browser
4. Locate the downloaded .apk file through your browser's download folder and install by clicking it. Press yes on any dialog you may receive.
5. Go to the application browser, locate and click the "Make My Run" application.
6. Happy Running!

Make My Run is an application for modern, healthy user who no longer can find inspiring routes in the city where he or she lives. Make My Run allows the user to generate a route based on the location of the user, providing mixture and variation into his or her workout routine.

What you can do

- You can generate a route which is displayed on a map by pressing the "Generate Run" button
- Start running a route by pressing the "Run" button
- You can stop the current running session by pressing the "Stop" button
- Check your statistics history by pressing the "View History" button
- Change the start and ending point of your route

What you cannot do

- Choose to run a path you've already ran before
- Pause the run
