Sprint Planning Date:	10/10/2012	Sprint Review Date:		-	Sprint Retrospective Date:	-
Product Backlog Items	Sprint Backlog Items		Est. man hours	In Production	Verification	DONE
Print screen of Emma's report and table of acceptance tests into Test Report version 0.4						Do after refactoring
Copyright and license in every file.						Do after refactoring
Put the polyline code into lib or, if that doesn't work, write clearly in that file that it doesn't belong to us.						X
Write reflection documentation. 1) Team, 2) Software engineering, 3) Coverage, 4) Doc						Coverage) If you used coverage tools. Was it worthwhile? What was good, whats was bad? Did you detect anything that wouldn't have detect else? etc
						Team) A report containing the reflections about working in teams and the difference between individual programming and working in a team
						Docs) A short report with reflections upon the methods used to create the documents. (E.g what tool did you use, how many were involved, did you version control throughout the process, was a text editor a good tool to use....).
						SE) A text with reflections of the appropriateness of the adopted SE techniques (E.g did you find starting with requirements helped specifying the system, did you like the waterfall approach, how would you suggest to do

Developer manual						How to do a release (Release procedures) Test Acceptance Unit (Emma)
						How to do build the project
Project plan						Summarize the HANDIN_X documents from a thoughts and visions point of view
Project refactor						Split MainActivity into subclasses
						Split large packages into smaller packages with logical somewhat MVC structure
						Remove Sonar violations which are easily fixed (RouteGeneratorTest mostly)
Review history button design and placement						Fix it
Prepare demo presentation						Se dokument
