

Product backlog item	Business value	Estimated crunches	Anton	John	Johannes	Niklas	Victor
Hello Map - An android application displaying a Google Map	200	10					
A view where a user can generate a random route from and back to his/her current position. It does not display the route but only gather information needed to display it	150	170					
Display progressbar and statusmessage during the whole generation progress.	150	130					
On unsuccessful generation an error message must be displayed and the user shall be returned to the generationview							
A view displaying a running interface with a map and the route generated drawn ontop of the map	140	145					
The ability to start running a route, displaying a running interface during the whole run.	120	50					
Display current GPS position on the running interface's map	135	80					
Display distance ran in running interface	130	50					
Display timer in running interface	130	25					
Generate a route with a set distance	125	120					
When the route has been ran, automatically save the route together with gathered statistics on my phone	115	100					
Stop a run from the running interface, this shall end the run as if the route was generated to end at this point but somehow save that the run was cancelled	100	60					
Minimize the times you cross your own path during a run, goal is one time, acceptable is 3	100	130					
Be able to play songs from spotify from inside project application	80	200					
Be able to point a song to a specific position. So that it starts at that point with a fade-out/fade-in.	50						
View statistics from earlier rounds	50						
Be able to have songs depending on average speed/km. If last KM took 4 minutes to run, that is fast bro! If you ran it during 7 minutes, that is slower.	40						
Provide text to speech directions during the run	40						
Set starting point and ending point for the route on a map	35						
Choose unit (miles or km) to be used throughout the whole app	30	20					
Use (run) an earlier saved route	30						
Set a bounding area to contain the generated route	30
