

Make My Run - Release Notes

Release 0.2.0

Date: 8/10 - 2012

New Features

- User can generate a route to run
- Distance that user runs is displayed
- Time is displayed when users runs the route
- Users position is displayed in real-time

Bugfixes

- Drawing the route is not causing lag anymore
- Route is now calculated from the correct position

Known limitations

- The user can not choose length to generate route from.
- The user can not change units between kilometres and miles
- The user can not choose an area to generate the route within
- The application can not display any statistics or provide any feedback once the user has "completed" a route.
- The user can not him or herself choose a start and end point for his or her route.
