π5 Sprint Backlog		FROM	9/26/2012		TO		9/30/2012	
Sprint Planning Date:			9/26/2012	Sprint Review Date:		10/1/2012	Sprint Retrospective Date:	10/1/2012
Product Backlog Items	**Sprint Backlog Items**		**Est. man hours**	**In Production**	**Verification**		**DONE**	**Available man hours**
A view where a user can generate a random route from and back to his/her current position. It does not display the route but only gather information needed to display it			12				One view for pressing the generate button	95
A view displaying a running interface with a map and the route generated drawed ontop of the map			18		One view for fetching the google data and displaying a progressbar Fetching includes sending the http request and parsing the response stream to a string and then to JSONObject			
			20				One view for displaying the generated route on top of a google mapview Draw our abstracted data ontop of a Google Map so that it clearly forms a route to run after	
			30				Calculate waypoints to send with start and end point at GPS position that should represent a half-decent route to the user in the end	
			16				Abstract JSONObject to our own classes
